Project: P223 **Title:** Flight Line Fire Station & Air Operations Facility **Rgn Reqs FY:**

Installation: NAVSUPPACT BAHRAIN **Project MTD:** **CWE($K):** 34,900 **Project CCN:** 14120

Region: CNR EU **Pri:** **Lead Propt:** CNIC N3 **Pri:** **COCOM:** CENTCOM

Mission of the Facility: The facility will house the Flight Line Fire station and AIROPS departments which provide emergency response to US critical assets in the airfield and US exclusive zones and carry outs C2 for units operating in the AO.

Project Scope: This project constructs a new pre-engineer building to house the Fire station and AIROPS departments, replacing the old trailer units with more durable and energy enfficient units. It provides adequate bays for fire trucks and equipment currently non-existent.

Impact if not Provided: The camp's personnel, equipment, facilities and airfield will be at risk of damage and destruction due to fire threats. The current facility cannot house the fire fighting force needed to adequately protect and serve the growing needs of the mission. The AirOps facility is not properly configured to support their mission and organizations personnel.

Region Mission Alignment: 3

The current fire station is not in compliance with UFC Standards and or NFPA 1500 requirements. Isa Air base is a Forward Operations Base supporting P8, F16, F18, V-22 OSPREY, MQ9, C130, C172 & C5's squadrons that operate continuously with constant surges. The current fire station is inadequate to support the growing needs of CMV-22 and UAV missions.

Lead Proponent Mission Alignment:

Region Readiness Support: 4

Current Capacity rating of 6%. Provides adequate facility needed to support critical assets and house the minimum required personnel and equipment needed to provided C2 in CENTCOM's AOR.

lead Proponent Readiness Support:

Region Operational Cost: 0

The flight line facilities run on generator powerm. The exisiting trailers account for a large percentage of the energy consumption as they operate 24/7. This project will provide energy savings.

Lead Proponent Operational Cost:

Region Severity Statement: 4

The existing fire station and AIROPS facility is in a detoriated condition and is currently operating with the minimum response capabilities. Currently there are no other alternate facilities to support this mission and requires a new foot print to support the flight squadrons that operate from Isa Air Base.

Lead Proponent Severity Statement:

Region Urgency Statement: 4

Primary mission is being accomplished with extreme workarounds due to lack of adequate facilities like maintenance bays, storage spaces in racks for personnel to pick and go like hose storage, PPE, gear lockers, EMT medical supplies , self-contained breathing apparatus etc. which directly impacts response times in case of an emergency .

Lead Proponent Urgency Statement:
