Project: P506 **Title:** AIRCRAFT PARKING APRON EXPANSION Phase II **Rgn Reqs FY:**

Installation: CAMP LEMONNIER DJIBOUTI **Project MTD:** **CWE($K):** 94,670 **Project CCN:** 11320

Region: CNR EU **Pri:** **Lead Propt:** CNIC N3 **Pri:** **COCOM:** AFRICOM

Mission of the Facility: The project is the #3 priority for CLDJ and will build required aircraft apron parking. CLDJ has an apron requirement of 390,828 SF to allow operations at CLDJ to park various heavy aircraft without NAVAIR wing-tip clearance waivers. This project, with P505, fully builds-out the developable land available around Enduring Apron.

Project Scope: Project constructs 159,517 SF aircraft parking apron and 5,667 SF taxiway in the Djiboutian Notch for 747s and C5s. This project is a continuation of P505, Enduring apron expansion, which accounted for only part of the full aircraft apron requirement.

Impact if not Provided: Without the additional parking apron, aircraft parking will require a NAVAIR waiver to violate the minimum wing tip clearances. The risk of damaging aircraft is high due to a lack of adequate parking and circulation, and nearly 100% of missions executed at night. Without this project, there will be an unpaved area between the flightline and planned hangars.

Region Mission Alignment: 4

The project is critical as it directly supports National Security mobilization and global posture within East Africa and the Arabian peninsula. CLDJ is designated as AFRICOM's primary logistical supply point, and primary location for COCOM mission logistical hub on the African continent. This project directly strengthens and fulfills aircraft apron space to support AFRICOM air, sea, and land theater capabilities. Additionally the project aligns with the mission to strengthen resilence of critical air assests and their supporting air operation infrastructure.

Lead Proponent Mission Alignment:

Region Readiness Support: 4

Project eliminates constant aircraft maneuvering/staging after the aircrafts are unloaded and parked. This project will directly improve workplace productivity and efficiencies for Air Operation personnel and pilots.

lead Proponent Readiness Support:

Region Operational Cost: 0

Does not demonstrate a cost savings.

Lead Proponent Operational Cost:

Region Severity Statement: 4

The project is critical to resolve a NAVAIR waiver in violation of wingtip clearances. Parking in violation of wingtip clearances, as part of normal operations, reduces safety and efficiencies, and increases the probability for aircraft damage to occur. Exacerbating the risk is that nearly 100% of operations are executed at night. The project directly mitigates risks to critical Fleet assets.

Lead Proponent Severity Statement:

Region Urgency Statement: 4

The project is critical to meet COCOM existing aircraft operations and projected aircraft growth at CLDJ. The existing parking apron, with P505 apron expansion, will not meet the 23 aircraft parking requirement. Additionally, failure to execute P506 will not provide full aircraft apron expansion into the Djiboutian Notch land. The land was acquired in 2014 for this specific P506 project.

Lead Proponent Urgency Statement:
