**Project:** P922 **Title:** Unaccompanied Housing Ph 3, Austere Standard **Rgn Reqs FY:**

**Installation:** CAMP LEMONNIER DJIBOUTI **Project MTD:** **CWE($K):** 76,540 **Project CCN:** 72127

**Region:** CNR EU **Pri:** **Lead Propt:** CNIC N9 **Pri:** **COCOM:** AFRICOM

**Mission of the Facility:** The facility is the # 4 priority for CLDJ and will provide permanent unaccompanied housing (UH) for personnel on rotational 6-12 month deployments.

**Project Scope:** UH Project (Phase 3) constructs 88,049 SF 5-story barracks, consisting of 113 (4+0) rooms with centralized bathrooms to accommodate 708 E1-E6 personnel.

**Impact if not Provided:** CLDJ will continue to use approximately 708 beds that are non-compliant with UFC and NFPA. CLDJ currently uses 26 tents (420 beds) and 354 CLUs that do not meet UFC and NFPA compliance. Energy consumption will continue to be high. Individual air conditioning units (ACUs), also known as window shakers, operate on each side of the CLU and run constantly. This accounts for 19 percent of the camp's electrical usage. A standard BEQ is expected to consume 30 percent less in electrical consumption.

**Region Mission Alignment:** 4

The UH project performs critical construction in support of growing population still reliant on tents and dilapidated CLUs (Condition Rating less than 60). This UH project supports rotational combatant forces (HOA, Marines, Air Force, Army, State Department). Due to security reasons, personnel are unable to be housed off base. The continued population increase in transient forces at CLDJ will remain dependent on 1416 beds lacking fire supression and adequate AT/FP standards. The expected CLUs to be vacated are at B, C, and D blocks, which were constructed back in 2006 (apprx 14 years ago).

**Lead Proponent Mission Alignment:** 4

Project provides adequate and habitable forward deployed beds for ~708 Enlisted service members and contributes to closing capability gap in forward area for UH base population.

**Region Readiness Support:** 4

The project is critical to Fleet/COCOM operations as it enables further base development where no off-base support exist. Housing off-base, the combative personnel, is not an option due to the high risk location and to assure standby readiness mission integrity. The project is also in direct support of Navy QOL initiative for a Fleet Concentration area. The project eliminates documented serious life safety hazards (Risk Assessment Code (RAC) I). RAC I documentation is signed and uploaded in EPG.

**lead Proponent Readiness Support:** 4

The projects eliminates documented serious life safety hazards (Risk Assessments Code (RAC I). RAC I documentation is signed and uploaded in EPG.

**Region Operational Cost:** 1

Project results in an estimated 20% reduction in energy consumption versus CLUs of equal berthing quantity. Individual air conditioning units currently in use run constantly and account for 40% of the Camp electrical usage. A standard UH facility is expected to reduce energy consumption by 20% versus tents & CLUs' electrical usage. $190K energy & $30K per yr savings. 24 yrs cost savings

**Lead Proponent Operational Cost:** 1

When compared with the equivalent number of CLUs, a standard permanent BEQ is expected to consume 30 percent less in electrical consumption.

**Region Severity Statement:** 4

There are 1,416 beds throughout the base that are assessed RAC 1 for lacking code compliant fire protection systems. Additionally the tents and CLUs lack wall hardening to meet AT/FP compliance. UH are primary gathering areas and are critical assets due to AT/FP threat. 26 tents supplement billeting, 420 beds. Tents are not permitted by UFC for over 180 days where perm. contr is practical

**Lead Proponent Severity Statement:** 4

The project eliminates documented serious life safety hazards (Risk Assessments Code (RAC I). RAC I documentation is signed and uploaded in EPG.

**Project:** P922 **Title:** Unaccompanied Housing Ph 3, Austere Standard **Rgn Reqs FY:**

**Region Urgency Statement:** 4

Resourcing was required in previous FY programming to meet existing permanent party and anticipated Force Structure Growth requirements. The November 2016 Berthing Phasing Plan listed the project to be programmed in POM20 and the 2016 CLDJ Master Plan identified P922 as a Tier 1 project. CLDJ UH requirement is expected to increase from current 4,327 PN to ~5,500 PN by FY25.

**Lead Proponent Urgency Statement:** 1

Urgency heightened by age and failure rate of CLU blocks B, C & D

**RAC:** I **ROI:** **PCI:**

**Stakeholder Endorsement**

**Region Consolidation/Footprint Reduction (SF):** 0

Project potentially frees 3 acres @ existing CLU complex layout.
