ADDENDUM 3 to the CNIC N4 PROJECT DEVELOPMENT AND ASSESSMENT GUIDE FOR SHORE PROGRAM OBJECTIVE MEMORANDUM, FISCAL YEARS (FY) 2026-2030 (POM-26): SPECIAL PROJECTS

Ref: (a) Electronic Project Generator (EPG)/Integrated Priority List (IPL) Special Projects Users Guide of February 2023

Encl: (1) POM-25 SRM Three-Year Investment Requirements Plan
(2) Region SRM Quotas
(3) Mission Need Date Documentation Form

1. Project Submissions. Regions are responsible for integrating all valid FY26 through FY30 SRM Special Projects into a five-year investment requirements plan.

a. In accordance with the POM-26 General Project Submission Guidance and Addendum 1, projects in FY25-FY27 of the approved POM-25 SMIG Investment Requirements Plan shall **not** be re-briefed to the SMIG WG unless requested. See enclosure (1) for the POM-25 SRM Three-Year Investment Requirements Plan.

(1) Special Projects in FY25 of the approved POM-25 SMIG Investment Requirements Plan are considered programmed and shall be excluded from POM-26 consideration.

(2) Special Projects in FY26 and FY27 of the approved POM-25 SMIG Investment Requirements Plan will automatically be carried into their respective fiscal year in the POM-26 SMIG Investment Requirements Plan. While not briefed, these projects will be validated by the SMIG WG; therefore, Regions shall still prioritize these projects among all other SRM requirements.

(3) The Decision Lens score for projects carried into POM-26 will be re-calculated using the algorithm in Addendum 1. The projects will not be re-assessed; the prior SMIG WG criteria scores will be used in the updated model. There is no requirement for Regions to reassess or rescore carryover projects.

b. All Budget Year (BY) through BY+4 unprogrammed Special Projects, to include projects carried over from the POM-25 SMIG Investment Requirements Plan as well as new requirements, must be included in the Region’s Integrated Priority List (IPL) module. Per Addendum 5, all projects in the IPL MUST be scored and evaluated by the respective Region Mission Integration Group (RMIG) using the Decision Lens Facilities Investment Model provided in Addendum 1.

(1) Installation Commanding Officers shall only plan and submit projects that are validated as a solution to a capability gap identified through a standard planning process, including Regional and Installation planning documents, specialized planning studies, and critical utilities infrastructure improvements. Planning efforts are NOT to be expended based solely on an Installation Commanding Officer's desire.

(2) Only projects with a current working estimate (CWE) of $2M or greater will be considered by the SMIG WG for CNIC centrally managed SRM funding; projects with a CWE less than $2M must be funded from local controls. Projects with a CWE between $2M and $7M may be funded from either local ST controls or submitted to the SMIG WG for CNIC centrally managed funding consideration. Projects with a CWE of $7M or greater must be submitted to the SMIG WG; Regions are not authorized to fund SRM Special Projects with a CWE of $7M or greater from their local ST controls without **authorization** from CNIC N46. See enclosure (2) for impacts on quotas.

(3) Mission critical, emergent BY and BY+1 projects will be assessed on a case-by-case basis and require a validated Mission Need Date. See enclosure (3) for a Mission Need Date documentation form.

2. Project Cost Escalations. If a project is not programmed in FY25 of the POM-25 SMIG Investment Requirements Plan, Installations/Regions shall escalate the cost by changing the FY in EPG. Installations/Regions shall not update supporting documentation until year of execution. Regions shall provide significant cost escalations and scope changes to CNIC and link in EPG for situational awareness.

3. Airfield Pavement. Airfield pavement restoration projects shall have a completed and recent PCI survey and be graded based on PCI with results uploaded into EPG. Actual PCI ratings shall be used to evaluate the projects in alignment with the criteria outlined in Addendum 1. Regions shall provide the date of last survey during Region briefs. This will assist the SMIG WG in the overall assessment of the project and contribute towards the Readiness Support score within the Strategic Alignment and Guiding Principles.

4. Demolition Program. Currently, there is $638M for demolition in FY25-28. Program guidance will be promulgated SEPCOR to address Facility Footprint reduction in support of Infrastructure Divestment and Consolidation initiatives across the Shore.

5. Region Briefing Quotas. To balance SMIG effort with the resourcing profile, the number of projects a Region may brief is limited; see enclosure (2) for quota allocations and exemptions.

6. Project Titles. Project titles must be as descriptive as possible and address the prominent scope Building Component System. For example, "Repair Roof of Building 13" is not acceptable. However, "Repair F/A-18 AIMD Roof - Bldg 13" is acceptable.

7. Coordination with Lead Proponents/Warfare Enterprises or Providers (WE/P). Installations shall coordinate project development with supported Commands and Tenants whose mission each project supports. Installations will identify the Lead Proponent/WE/P using the tables included in the POM-26 Project Development and Assessment Guide. Installations must ensure the appropriate WE/P is identified. Enterprise Stakeholders (i.e. TYCOMS and SYSCOMS) should identify and capture readiness impacts and sustainment metrics in applicable planning documents and project prioritization to inform SMIG prioritization and OPNAV funding decisions.

8. Program Element (PE) Guidance

a. Fleet and Provider. The majority of utility projects will fall under the Fleet and Provider PE. Regions shall brief their FY28-30 utility special projects to the SMIG WG for review and assessment.

b. Shipyards. Infrastructure Optimization Program (SIOP) projects will no longer be assessed or ranked by the SMIG WG. Do not submit SIOP projects for the POM-26 SMIG assessment. Sustainment (ST) projects are not considered SIOP.

c. Unaccompanied Housing (UH). The CNIC UH Program will prioritize barracks projects in Shore Cross-Functional Team Level of Effort #5 locations (CLDJ Djibouti, NAVBASE Coronado, NAS Oceana) as well as NSA Bethesda, SUBASE New London, NAS JRB New Orleans, Joint Base Pearl Harbor Hickam, NAS Lemoore, NAS Sigonella, NAVBASE Kitsap, NAVBASE Guam, Joint Expeditionary Base Little Creek-Fort Story and CFA Okinawa. UH facility projects must eliminate all master system deficiencies for FAILING/POOR condition UH Buildings (Barracks and Dormitories) and have a FAILING/POOR condition rating (CI) score of (69) or below to be prioritized by CNIC N93. MyNavy HR will continue to prioritize all dormitory projects in their AOR. For further guidance on UH quotas, refer to enclosure (2).

UH project 1391s must adhere to FC 4-721-10N published 19 May 2022 and include the following:

- Title clearly identifying the elimination of Failing/Poor
- Condition Rating (CI)
- Official iNFADS facility number
- Scope specifying which major building systems and modernization/building code deficiencies are resolved to deliver a combined Good CI score (100-90) upon completion
- Design type and number of bedrooms to be returned

UH Special Project 1391s to eliminate inadequate conditions do not require a statement of personnel requirement/deficit. Neither Budget Year Housing Requirement Module (HRM) R-19 data nor Basic Facility Requirement (BFR) data need to be included in 1391 Blocks #10 or #11.

d. Nuclear Deterrence Enterprise Review (NDER). Regions (CNRNW and CNRSE) that have NDER requirements within their Area of Responsibility (AOR) shall brief their FY28-30 requirements to the SMIG WG for review and assessment. NDER projects will be determined by and in close coordination with Strategic Systems Program (SSP). For further guidance on NDER quotas, refer to enclosure (2).

e. Naval Education Enterprise (NEE). Regions (CNRMA, CNRNDW and CNRSW) that have NEE requirements within their AOR shall brief their FY28-30 requirements to the SMIG WG for review and assessment. For further guidance on NEE quotas, refer to enclosure (2).

f. Medical Readiness (MED). Regions that have Medical Readiness requirements within their AOR shall brief their FY25-30 requirements to the SMIG WG for review and assessment. Medical Readiness projects will be determined by and in close coordination with Bureau of Medicine and Surgery (BUMED). For further guidance on BUMED quotas, refer to enclosure (2).

9. Points of Contact. If additional information is required, the Region should contact LCDR J.R. Rodriguez, DSN 312-433-3650, commercial 202-433-3650, e-mail jose.r.rodriguez368.mil@us.navy.mil; and Belvelyn Williams DSN 312-288-0118, commercial 202-433-0118, e-mail belvelyn.l.williams.civ@us.navy.mil.

1. Projects with a CWE of $7M or greater that were originally planned to be executed using a Region's local ST controls in FY25 or FY26 shall be briefed to the SMIG WG as a SRM Special Project brief. These projects will be considered a CNIC directed brief and will not count against quotas.

2. The SMIG WG may request a brief for any project in the approved POM-25 SMIG Investment Requirements Plan not previously briefed. If requested, first-time briefs for previously not rated (NR) projects will not count against quotas.

3. In addition, the following requirements do not count towards Region's quota:

- CNIC directed adds and SMIG WG requested briefs.
- Projects with external drivers: SLD MND, new system requirements, PBIS directed line-items, and projects that are a result of bigger Navy agreements (e.g. environmental compliance projects or litigation).
- The top OMNR project in a Region.
- Dry dock certification and nuclear authorization requirements.
- Poor and Failing CDC and UH special projects.
- Regions are authorized a set number of exemptions for projects with a designated/separate Program Element (PE) funding in accordance with following table:

Program Element	Number of Exemptions
Fleet and Provider	None
Q3/Q4 UH and CDC	Unlimited
NDER	Unlimited
NEE	Unlimited
BUMED	Unlimited

Mission Need Date Documentation Form

Instructions:

1) A project may not have a MND. Specifically, repair projects when the repair just needs to be completed as soon as possible. However, some have unique considerations for planning, programming and execution that establish a Supported Command's need date. For these projects, in the Basis for the MND, state what these considerations are for the project (project duration, impacts if not provided (life or fire safety, etc.), describe operational availabilities (wharf or dry dock outages) that must be met. For RBOD, where the Supported Command has equipment outfitting or certification, add "Supported Command will need X days after BOD for equipment outfitting, certification…"

2) A MND can be in the past. Which means the project is "late to need", due to programming delays or emergent requirements. (Do not use a MND that is prior to initial submittal of this project for programming as this is not achievable.)

3) A PDF of this document will be attached in EPG and merge PDFs of any e-mails that support the MND and who provided it, so that there is only one document in EPG. The EPG file name is: PXXX_MND_Doc_YYYYMMDD.

Definitions (from NAVFAC Chief's Kilo-Gram K20-20, dated 21Oct2019):

1) Mission Need Date (MND):
The date by which the Supported Commander needs to start using the facility. The MND should have some basis, e.g. arrival of ships, aircraft, personnel, and or equipment. At MND, the facility must be fully ready for use to include any equipment fit out, etc. The Supported Commander defines MND. Only the Supported Commander can authorize changing the MND. The MND provides an important reference point for NAVFAC to compare for performance purposes.

2) Required Beneficial Occupancy Date (RBOD):
The date that NAVFAC is committing to the Supported Command to have all of its NAVFAC contractual obligations (e.g. facility construction and any equipment outfitting) and provide the facility for the Supported Command to then complete any of their own additional outfitting. This date should be coordinated with the Supported Command to ensure any follow-on work by the Supported Command has adequate time ahead of the overall Mission Need Date (MND). The RBOD is calculated as the MND minus the time required by the Supported Commander for any additional

equipment fit out and other customer preparations (if there is no equipment fit out or other preparations, then RBOD = MND).
