ADDENDUM 5 to the CNIC N4 PROJECT DEVELOPMENT AND ASSESSMENT GUIDE FOR SHORE PROGRAM OBJECTIVE MEMORANDUM, FISCAL YEARS (FY) 2026-2030 (POM-26): Region Mission Integration Group (RMIG) Guidance

Ref: (a) Shore Mission Integration Group (SMIG) Charter of 05 May, 2021

Encl: (1) RMIG Best Practices
(2) SMIG Working Group and RMIG Collaboration

1. Scope. Addendum 5 provides the overall framework and governance for implementation of an integrated Region Mission Integration Group (RMIG) structure for the Navy Enterprise. It establishes uniform governance for generating shore investment priorities while allowing some flexibility in overall Region process. The establishment of Installation Mission Integration Groups (IMIGs) to support RMIGs is at the Region's discretion. However, in the absence of Region IMIG guidance, Installations are not precluded from establishing IMIGs to prioritize Installation facility requirements. For the purposes of this guidance, only RMIGs and RMIG Working Groups are addressed.

2. Purpose. The main purpose of the RMIG is to optimize effectiveness in delivering sustained and improved shore readiness to the Fleet, Warfighter and Family in support of the Shore Mission Integration Group (SMIG) per reference (a).

3. SMIG. The SMIG is the senior Shore forum to enhance involvement from Lead Proponent/WE/P in Shore-based issues, to address inconsistencies or shortfalls with Shore services and support, and to advocate for improvements in Shore capabilities. The SMIG provides oversight and ensures the Navy Enterprise is judicious in the use of limited resources while sustaining mission-capable installations and Shore programs integral to the Navy's future vision. The overarching purpose of the SMIG is to assess Shore requirements and deliver a plan in which Shore based support will maximize Fleet readiness. The SMIG will ensure concerns are considered and will balance risk and requirements across all Enterprise missions.

4. RMIG. The RMIG is the shore's Region-level senior executive forum for integrated Regional decision-making and prioritization. Lead Proponent/Warfare Enterprise and Provider (WE/P) priorities and supported commander demand signals are paramount, and shall be incorporated into facilities planning to ensure shore infrastructure decisions reflect Fleet priorities. A holistic

approach to evaluating mission requirements and closing mission capability gaps is needed. The RMIG must be empowered to outline goals and objectives in close coordination with Lead Proponent/WE/P representatives. Similar to the SMIG and SMIG WG relationship outlined in reference (a), the RMIG Working Group shall function to directly support and staff issues for the RMIG. See enclosures (1) and (2) for RMIG best practices and collaboration levels.

a. The RMIG shall be chaired by the Regional Commander (REGCOM) or REGCOM designated representative. RMIG voting membership shall include global representatives with decision-making authority (or their designees) from resident WE/Ps and/or Navy Component Commands (NCCs). The Region N4 shall attend and participate in all RMIG meetings.

b. The RMIG Working Group shall be made up of proxies from the RMIG and shall be chaired by the Regional Engineer or Region ED. Resident Lead Proponents/WE/P and/or NCC, N-Codes, and Installation Commanding Officers (per the Region's discretion) shall also be RMIG Working Group voting members.

c. Other members to both the RMIG and RMIG Working Group may include, but are not limited to, Program Directors, Chief of Staff, CNIC Headquarters N4 and/or N5 Warfare Enterprise Action Officers (WEAOs), and the Fleets.

7. RMIG Deliverables. The RMIG shall oversee the development of executable multi-year facility programs including operational concept improvements. In addition, the RMIG shall integrate and prioritize installation requirements across the Region with inputs from all stakeholders.

a. RMIGs are responsible for evaluating capability gaps within the Region and reviewing the Enterprise level planning analysis, Installation Development Plans, and Strategic Laydown initiatives to deliver facility investment Integrated Priority Lists (IPL) to the SMIG Working Group.

b. Per Addendum 1, IPLs shall be submitted in the form of a five-year investment plan. The Structural Model and Weighted Priorities (rating criteria) detailed in Addendum 1 shall be used to assess and prioritize all new requirements being briefed to the SMIG WG. Priorities generated by the model are a tool; Regional Commanders may deviate from model's order with final priorities being recorded in the IPL. Following prioritization,

a second-pass review based on urgency shall be conducted to identify the required year of execution for each project.

c. RMIGs are responsible for delivering the following IPLs to the SMIG Working Group in alignment with the POM-26 Project Development and Assessment Guide:

(1) Military Construction (MILCON) IPL
(2) Special Projects IPL
(3) Unspecified Minor Construction (UMC) IPL

8. CNIC point of contact regarding this matter is CDR Cody Keesee, Shore Governance Program Manager, DSN 288-4409, commercial (202) 433-4409, or e-mail cody.w.keesee.mil@us.navy.mil.

REGION MISSION INTEGRATION GROUP (RMIG) BEST PRACTICES

Components	Minimum Requirements	Best Practices	Comments
Scope	• Military Construction (MILCON) • Special Projects • Unspecified Minor Construction (UMC)	*MILCON, Special Projects, UMC and:* • Space Management • Energy • Capability Gaps	• RMIG does not have to tackle all Region issues, can be delegated to the RMIG WG.
RMIG Membership	• **RMIG Chair:** Regional Commander (REGCOM) or REGCOM designated representative • **Membership:** Global Representatives with decision making authority (or their designees) from resident WE/Ps and/or Navy Component Commands (NCCs) • Region N4 participates in all RMIG meetings	• **RMIG Chair:** REGCOM • **Membership:** Global Representatives with decision making authority from resident WE/Ps and/or NCCs participate **and vote** • Region N4 participates in all RMIG meetings • **Advisory Members:** Program Directors, Chief of Staff, CNIC Headquarters N4 and/or N5 Warfare Enterprise Action Officers (WEAOs), and the Fleets	• The RMIG/RMIG WG membership varies greatly from Region to Region. Almost all Regions include the Global WE/P representatives. • The unanimous preference includes Global WE/P representatives with voting authority and Region N-codes as advisory participants.
RMIG WG Membership	• **RMIG WG Chair:** Regional Engineer or Region ED • **Membership:** Proxies from the RMIG - Resident WE/P and/or NCCs, N-Codes, and Installation Commanding Officers (per the Region's discretion)	• **RMIG WG Chair:** Regional Engineer • **Membership:** Proxies from the RMIG (Resident WE/P and/or NCCs), N-Codes, and Installation Commanding Officers	• More open participation allows collaboration and perception that there is an ability to influence decisions.
Processes:	• **Project Briefs:** Region's discretion • **Prioritizing Projects:** – Region hears stakeholder concerns but makes final decision – Decision Lens used to prioritize MILCON and Special Projects requirements and strongly encouraged for UMC requirements	• **Project Briefs:** Installation Commanding Officers Brief their Requirements as having project ownership yields informative briefs, with more focus on operational-type impacts • **Prioritizing Projects:** – Decision Lens is the starting point and used to prioritize MILCON, Special Projects, and UMC requirements. – Other stakeholders have a vote but Region (as the chair) has the final say if resolution cannot be reached.	• Scoring of Projects ranges from ARE only to full scoring by all WG members to include Region and WE/P representatives. • When processes are inconsistent or not defined it creates significant variance between RMIG and SMIG rankings. • A key part of the overall process is WE/P participation at a significant (Scoring / Ranking) level.
Deliverables	• MILCON IPL • Special Projects IPL • UMC IPL	*MILCON, Special Projects, UMC IPLs and:* • Energy IPLs • Space Management Plans • Capability Gap Analysis • Region Integration Plan (RIP)	

Collaborative Process Across Enterprise

Typical Region Mission Integration Group (RMIG)

Region (COS and N-code reps) Region Commander (Chair)	Warfighters (Warfare Enterprises, COCOMs, NCCs and Numbered Fleets in AOR) (May Vote)	Providers (NAVSEA, NAVAIR, NAVFAC, and MPT&E) (May Vote)

↕

Typical RMIG WG

Region (CO and N-code reps) Region N4 (Chair)	Warfighters (Warfare Enterprises, COCOMs and Numbered Fleets in AOR) (May Vote)	Providers (NAVSEA, NAVAIR, NAVFAC, and MPT&E) (May Vote)

- Echelon II Level Process (SMIG WG)
  - Assess projects from all CNIC Regions
  - Lead Proponents (WE/Ps, COCOMs, NCCs) invited to brief the SMIG WG with a focus on strategic initiatives and mission impacts
- Echelon III Level Process (RMIG)
  - Use the same mathematical model as the SMIG WG in the prioritization process
  - Membership and processes vary among Regions, which can impacts ability of stakeholders to influence decisions
  - Current focus on MILCON (MCON) and Special Projects (O&M,N) though Space management and Energy may also be addressed within the RMIG construct
  - Regional Engineer briefs priority requirements to the SMIG WG and Lead Proponent/COCOMs participate
- Echelon IV Level Process (IMIG)
  - Installations not required to use the same process to determine priorities, but some do
  - Major tenants and N-codes typical membership
